## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the prior art of record, Voorheis et al. (2003/0229183), discloses a golf ball comprising a core made from a) 49% polybutadiene synthesized with a lanthanide series element (rare earth metals) having a cis-1,4 bond content of at least 80%, b) 0.05 to 18 phr organic peroxide, c) unsaturated carboxylic acid, d) sulfur based curing agents, and e) fillers. The present invention differs from Voorheis, the instant invention claims at least 60 to 100% of the core is made from a polybutadiene synthesized with a rare earth metal having a cis-1,4 bond content of at least 60%. Voorheis further fails to include the deformation of the core and golf ball as well as the cover composition. The cover of the present invention is made from a mixture of a block copolymer having amino groups at its terminal and an ionomer resin wherein the ratio is 3/97 to 60/40; while Voorheis discloses a cover made from ionomers, polyurethanes, etc.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
